

North Central Victoria

The North Central CMA region consists of four river catchments and covers 13% of Victoria. It is an agriculturally diverse region with many unique natural features, including the Box Ironbark Forests and the Internationally important Gunbower and Kerang wetlands. This illustration celebrates the region's diversity.

Acknowledgement of Country

The North Central Catchment Management Authority acknowledges Aboriginal Traditional Owners within the region, their rich culture and spiritual connection to Country. We also recognise and acknowledge the contribution and interests of Aboriginal people and organisations in land and natural resource management.
