EMBEDDING SUSTAINABILITY ACROSS THE F-10 CURRICULUM

Join [Environment Education Victoria](#) to learn exciting and meaningful ways to teach sustainability.

All sessions free & online

[BOOK HERE](#)

1. Your Sustainability Vision

Guided by Verity Mclucas from EEV, get to the heart of why sustainability is important to you. Through deep personal reflection, and in response to key questions, you will develop your own Sustainability Vision. This Vision will give you more clarity, agency and direction, and support your approach to embedding sustainability in your teaching practice.

Thursday 21st October 4:00-5:00PM

This workshop series is supported by the Department of Education and Training, Strategic Partnerships Program

2. Books That Move You

Get your students outside and excited to use words with an approach you can tailor to any age or ability.

Experience being in your students' shoes as you create a 'travelling story' and 'story map'. Guided by award winning author-illustrator, [Trace Balla](#), you'll leave this workshop feeling inspired and confident to support your students to connect to nature and create their own stories.

Thursday 11th November 4:00-5:00PM

3. Revegetation for Reconciliation

Join Melbourne Girls College teacher, Andrew Vance, along with his students, to learn about the power of the Murnong (Yam Daisy). Discover how revegetating their local riparian zone with edible indigenous plants has impacted reconciliation, biodiversity and the school's curriculum over the last 10 years. And what they plan for the next 10.

Thursday 25th November 4:00-5:00PM
