

Dull Dams to Dynamic Dwellings

Ask The Expert webinar

with ANU's lead scientist, Professor David Lindenmayer

From this . . .

To this!

Do you have a dam at home or at school?

Ever wondered how we can help dams reach their full potential?

Let's *reimagine* dams as clean, green, productive hot spots!

Submit your questions to be answered by our expert !

David Lindenmayer is the lead scientist of Australian National University's Sustainable Farms program

1. Tune into the topic first by viewing;

- a. [Farmers taking action: enhancing farm dams](#) (5min14 video)
- b. [Improving farm dams: a farmer's perspective](#) (3min54 video)

2. Generate some questions you'd like to ask David – about himself, his work, how we can make the most of farm dams, the benefits of doing it, etc . . . (these will be asked on your behalf during the interview with the recording made available for on-demand viewing)

3. Email questions labelled with student, class and school name to riverdetectives@nccma.vic.gov.au by **Monday 29th April** (you might even email a photo of the dam you would like to improve . . .)
